WELCOMING REMARKS

Assalamu'alaikum warahmatullahi wabarakatuh.

Peace be upon you.

Warm greetings to all of us.

I am as the Chairman of Stem Cell Research and Development Center, Airlangga University, Surabaya, Indonesia welcome and thank you to all participants attending the 1st Surabaya Conference in Stem Cell and Biomedical Sciences, 3-4 November 2018 in Aula Garuda Mukti, Kampus C Unair. As the first international conference in Surabaya, this event will provide real insights to improve understanding of medical application of stem cell and biomedical sciences. The presence of so many key players, experts, and leaders from several countries attests to the importance of the issues that we are to discuss.

Stem cell research is one of the most fascinating areas of contemporary biology, but, as with many expanding fields of scientific inquiry, research on stem cells raises scientific questions as rapidly as it generates new discoveries. Laboratory studies of stem cells enable scientists to learn about the cells' essential properties and what makes them different from specialized cell types. Scientists are already using stem cells in the laboratory to screen new drugs and to develop model systems to study treatment in diseases and clinical application, giving a new discovery in biomedical sciences.

As the chairman of the Stem Cell Research and Development Center committee, I know that the success of this conference depends on many people working in planning and organizing. In particular we are grateful to the entire committee, the sponsors and all participants who have participated in order to make this event came true.

Finally, I and all the organizing committee apologize if there are shortcomings in the implementation of this event because we realize everyone can be mistaken. Let me reiterate my sincere hope that this conference will result in success.

Wassalamu 'alaikum warahmatullahi wabarakatuh.

Warm regards,

Dr. Purwati, dr., Sp.PD, K-PTI, FINASIM

Chairman of Stem Cell Research and Development Center
Airlangga University

INTRODUCTION

In order to improve science and technology development in an increasingly advanced era. Therefore, Stem Cell Research and Development Center of Airlangga University, adopted from the Center for Higher Education Science and Technology program (PUI PT) held an international symposium.

The growing need for extraordinary health services also demands the development of medical science that will serve as the basis for quality services from the scientific, patient safety and medical people in it. Formal education alone is still less able to offer a full service. Therefore, short courses and symposium are very useful in providing new knowledge to medical person.

Surgery, Pharmacology and Psychotherap treatment has grown very rapidly, it is also necessary think about the body cells regeneration. Currently stem cells has been developing for variety of treatments. This knowledge should be developed and recognized by all medical people, in Indonesia in order to answer the community's questions about the ability of medical people in stem cell treatment.

The seminar was held to answer the challenge, with the theme of "stem cell and biomedical sciences". This topic is very interesting because it targets are patients management with difficult cases that have only been given "conservative" treatment.

Symposium Purposes

1. Increase understanding of medicolegal application of stem cell and biomedical sciences.
2. Improve participants' understanding of stem cells and biomedical sciences.
3. Improving the publication of research in the field of stem cells and scopus-indexed biomedical sciences.

WILL BE SUBMITTED TO SCOPUS INDEX

Abstract Submission Guidance

1. Oral Presentation

Oral presentations are simultaneous, themed sessions included throughout the program, with seven to eight presentations per session. Each presenter is allocated 10 minutes for presentation followed by 5 minutes for questions. A Chairperson will coordinate the session.

Abstract Submission:

- Abstract Title
- Abstract Authors (up to 6 authors may be listed)
- Abstract Presenter (a maximum of 1 presenter is permitted and should be the person submitting the abstract)
- Abstract Structure – Introduction (include aim/purpose); Methods; Summary of results & Discussion; Conclusions; key word maximal 4
- Word Count 250- 300 (Extended Abstract 5 – 8 Pages with Structure headings are included in the word count)
- Select 1 key topic
- You will be given the option to select that your abstract but still in terms of Stem cell and Biomedical Sciences
- You should be prepared to present at any time between 13:00 pm to 16:45 pm on Saturday, 20th October 2018.

Deadline for submissions: The deadline for submissions is **August 31st 2018**, we regret after this date we are unable to accept any further submissions. Decisions will be announced by **September 20th 2018**.

2. Poster Presentation

Posters will be grouped together in themed sessions for presentation. Approximately 14 presenters for each theme will be asked to give a 4 minutes presentation to introduce key messages of their poster, followed by a 2 minute questions and discussion. Each session will have a Chairperson.

Abstract Submission:

- Abstract Title
- Abstract Authors (up to 6 authors may be listed)
- Abstract Presenter (a maximum of 1 presenter is permitted and should be the person submitting the abstract)
- Abstract Structure – Introduction (include aim/purpose); Methods; Summary of results & Discussion; Conclusions; key word maximal 4
- Word Count 250- 300 (Structure headings are included in the word count)
